PROFILE

Soon to be Scrum Agile certified Front-end web developer proficient in HTML5, CSS3, JavaScript (ES5, ES6+), Git, and GitHub. Demonstrated expertise in utilizing advanced features of ReactJS, including React Hooks, to build interactive and responsive user interfaces. Skilled in creating engaging user experiences with WordPress CMS. Strong foundation in design principles and REST API consumption. Committed to continuous learning and staying up-to-date with the latest web development trends.

TECHNICAL PROJECTS

Mindset – Headless React | BCIT

May 2023

- Utilized WordPress as the backend CMS and managed content using REST API.
- Implemented a headless architecture, separating the React frontend from the WordPress backend.
- Leveraged REST API endpoints to fetch and retrieve data from the WordPress backend.
- Created custom API calls to retrieve specific data for the application.

Flixxr – Movie Database React App | BCIT

April–May 2023

- Designed and created a mockup of a movie database using Photoshop, and translated it into a fully functional prototype using Adobe XD.
- Collaborated closely with a team of three to bring the movie database prototype to life using React.js and SCSS, implementing user-friendly features such as a search feature, a favorite page and dynamic data display from an external API.
- Demonstrated strong problem-solving skills and a keen eye for user experience throughout the project's lifecycle.
